## **Geotechnical Engineer/Technician**

Coleman Engineering Company is actively recruiting candidates to hire and train as geotechnical engineers and technicians for our Iron Mountain and Ironwood, Michigan offices. The successful candidate(s) will be initially trained as geotechnical technicians to fully learn all of the aspects of soil/bedrock as well as other construction processes as they relate to foundation design and construction related engineering. Duties would include working in the field and laboratory along with other technical staff and engineers. Field work will be a large portion of the training and will consist of working around geotechnical drilling and sampling rigs, performing in situ borehole testing, logging boreholes and monitoring construction activities related to foundation construction. Other duties would include field report preparation, quality management of test results/reports, working with clients, and become familiar with the geotechnical market and the profession.

Geotechnical engineer candidates will be supervised by a senior geotechnical engineer. Geotechnical engineering emphasis will focus on evaluating subsurface conditions and parameters as it relates to a variety of construction applications which would include foundation support, slope stability, surface and groundwater infiltration, groundwater modeling, and applying laboratory test results associated with geotechnical evaluations.

Personal traits will require a strong mathematical background, positive attitude, working in a team environment as well as being a motivated self-starter, creative thinking, willingness to travel throughout the Midwest, light duty manual lifting, and physically fit to work in a variety of outdoor environments.

To apply, complete the employment application located on our website. Applications can be emailed to [llindquist@coleman-engineering.com](mailto:llindquist@coleman-engineering.com) or mailed to 635 Circle Drive, Iron Mountain, MI 49801. EOE.
