Geotechnical Engineer

Coleman Engineering Company is seeking a qualified Geotechnical Engineer in our Iron Mountain, Michigan office. The successful candidate will have knowledge of all aspects of soil/bedrock as well as other construction processes as they relate to foundation design and construction related engineering and will preferably have 5+ years of experience. Duties could include working in the field and laboratory along with other technical staff and engineers. Field work will be required at times and will consist of working around geotechnical drilling and sampling rigs, performing in situ borehole testing, logging boreholes and monitoring construction activities related to foundation construction. Other duties would include field report preparation, quality management of test results/reports, and working with clients.

Geotechnical Engineer candidates must understand the geotechnical market and profession. Geotechnical engineering emphasis will focus on evaluating subsurface conditions and parameters as it relates to a variety of construction applications which would include foundation support, slope stability, surface and groundwater infiltration, groundwater modeling, and applying laboratory test results associated with geotechnical evaluations.

Personal traits will require a strong mathematical background, positive attitude, working in a team environment as well as being a motivated self-starter, creative thinking, willingness to travel, light duty manual lifting, and physically fit to work in a variety of outdoor environments.

Interested candidates can forward resumes to Coleman Engineering Company, 635 Circle Drive, Iron Mountain, MI 49801 or by email to llindquist@coleman-engineering.com. EOE.
