CIVIL ENGINEERING PROJECT MANAGER

Coleman Engineering Company is an industry leader in design and construction for a wide variety of civil engineering related projects in the Upper Midwest. We are seeking a qualified Project Manager ready to take responsibility for the design and construction management of projects required to meet our clients' needs. Duties will include a wide range of project design and construction related responsibilities.

Areas of practice will include management of engineering staff, project management, proposal writing and limited office management responsibilities.

Minimum Qualifications

- B.S. in Civil Engineering with academic coursework directly related to the areas described above
- Computer skills and familiarity with Microsoft Word, as well as intermediate to advanced abilities in Excel
- Familiarity with AutoCAD, Civil 3D, or other CAD-based civil design software
- Strong interpersonal, verbal, and written communication skills
- A flexible working style, self-motivation, initiative, and a willingness to modify personal schedules as required to meet client needs and project schedules
- Conscientiousness concerning the accuracy, appropriateness, and timeliness of results
- Legal authorization to work in the United States without the need for sponsorship
- Acceptable driving record

Preferred Qualifications

- Registered Professional Engineer
- 8 years of related work experience
- Familiarity with state and federal infrastructure funding applications
